Research Title : Two new naphthalene and anthraquinone derivatives from *Asphodelus tenuifolius*
Two new naphthalene and anthraquinone derivatives from *Asphodelus tenuifolius*

Descriptipn : Abstract: Chromatographic separation of an ethanolic extract of rhizomes of *Asphodelus tenuifolius* Cav, (Asphodelaceae) yielded in addition to P-sitosterol, stigmasterol and two anthraquinone derivatives, 1,8-dimethoxynaphthalene as well as two new naphthalene derivatives. The new compounds were identified as 2-acetyl-8-methoxy-3-methyl-1-naphthol and 2-acetyl-1,8-dimethoxy-3-methylnaphthalene. The separated compounds were identified on the basis of IR, MS, H-1 and C-13 NMR data.
